

# SAGE 50CLOUD PASTEL XPRESS ADDITIONAL MODULES

## 1. Debtors Manager

Sage Pastel Debtors Manager is a debtor management system suitable for any business in any industry seeking to optimise the debtor collection process. Sage Pastel Debtors Manager debt collection software has been designed to instantly implement tracking and control in your debtor's collection department. Unlike other products which tend to focus on the macro level, this is a hands-on practical system that automates the daily control of the debtor's book. This debt recovery module is only available while you have a valid Sage Pastel Business Care Licence contract.

Sage Pastel Debtors Manager creates reports to monitor debt collection progress, staff performance and accurately forecasts cash flow, it also has ready to run debtor's management reports for every outstanding invoice, you can determine why the amount is outstanding; when it will be paid; what has been done and what still needs to be done.

A comprehensive  
summary of each  
module

## 2. Point of Sale

Sage Pastel Point of Sale (POS): An affordable, simple and secure payment handing retail solution for small and medium businesses. It is a powerful tool, yet easy to set-up and operate, Sage Pastel POS is keyboard friendly for fast processing. Simple screens and large display areas make this cashier-based system ideal for any till point. Sage Pastel POS interfaces with most popular barcode scanners, cash drawers and pole displays. Once installed and set up, tellers can be trained and working in record time. Sage Pastel's Point of Sale security features helps prevent potential theft

Since Sage Pastel's POS system is fully integrated, POS makes use of the security controls within Sage Pastel Accounting, as well as allow you to assign access per user in POS.

Sage Pastel Point of Sale Back Office and Reporting features POS integrates seamlessly with Sage Pastel Xpress or Sage Pastel Partner, therefore all the stock reports that you have become accustomed to using, are available for reporting POS transactions. Additional back office functionality includes supplier processing, account payments, viewing customer age analyses and statements. Using Sage Pastel's advanced stock control and price matrix; you are able to determine pricing per customer, volume based discounts and special prices.
